MINOR MATTERS.

Holland Preparing to Protect Her Farmers by Levying a Duty on American Wheat.
WASHINGTON, Sept. 20.—The Secretary of State has received a dispatch from her minister at The Hague, giving additional information in regard to a proposition of the Netherlands government to levy protective duties on imported breadstuffs. A bill to that end is now pending in the States General, with some prospects of becoming a law. It is asserted in a memorial accompanying the bill that the exceedingly favorable conditions which prevail in the United States is one of the main causes of the decline of agricultural interests in Holland, and necessitates the protective legislation. It is also argued by the advocates of the measure that unless Holland follows the example of France, Austria-Hungary, Sweden and Norway in protecting her agricultural interests will soon fall into decline.

The receipts from all sources during the year aggregated \$1,188,527; the expenditures, \$699,097, leaving a surplus for the year of \$489,430, which makes the total amount in the United States Treasury for the year ending June 30, 1889, \$2,531,626. A comparative statement shows that the receipts of the office were \$65,363 in excess of those of last year, while the expenditures were \$45,967 in excess of those of 1888.

Child Murderer Commits Suicide in Prison—Opening of the DePauw University—State Miscellany.

A Sample of the Difficulties Experienced Under the New School-Book Law.
Special to the Indianapolis Journal.
DANVILLE, Sept. 20.—County Superintendent Gossett is still having trouble with the Indiana School-Book Company. With an honest desire to comply with the requirements of the new law, he from the first urged the trustees to do all in their power to create a friendly feeling for the new series, and to make early requisitions for all needed supplies. He was successful in reconciling the board and the people to the new dispensation, and as early as August, the books were ordered for all the schools. One had received on July 15 a circular-letter from the school-book company, in which the company, while reminding him that the law allowed it ninety days in which to fill the orders throughout the State, assured him that Hendricks county should be supplied with all books needed within twenty days—in good time to fit out and grade the classes.

Twenty and thirty days passed and not a book came, though Superintendent Gossett had from the company repeated assurances that the books would all be on hand before the schools commenced. The schools of the county opened Sept. 9 without books. The teachers delayed organization for two or three days. The superintendent kept notifying the book company of his embarrassments, and the company kept repeating their false promises.

Last week a shipment of books reached Danville. Upon opening them Mr. Gossett found that the shipment was the complete set of the new series, but that the books were not the books which the county opened Sept. 9 without books. The teachers delayed organization for two or three days. The superintendent kept notifying the book company of his embarrassments, and the company kept repeating their false promises.

Preferred Death to Life Imprisonment.
Special to the Indianapolis Journal.
MONTICELLO, Sept. 20.—John Gross, who was convicted last week of murder, and sentenced to life imprisonment, committed suicide by hanging himself last night, to his cell door. The history of the crime for which he was convicted is a peculiar one. John and Catherine Gross were married in Russia some ten years ago, came to this country about 1881, and settled at South Bend. From there John Gross moved to the county, about seven years ago. His wife remained at South Bend. Last spring a reconciliation between husband and wife was effected, and upon the wife coming to her home where Gross lived, he discovered that she had two children that had been born to her since he left her, one ten days old. Notwithstanding these facts, he received her and the children. The wife took sick in June, and died. John and the mother, Catherine, were indicted by the last grand jury and tried at the term of court, John receiving a life sentence and the mother being acquitted, yesterday, by a jury, after a four-days trial. Yesterday the mother received a motion for a new trial, and when all hopes of evading his sentence had gone, he resolved to take his own life, which he did, by taking two hemp loops and hanging himself, tying one end of it to the upper part of his cell-door and the other about his neck.

The students are distributed among all of the departments, the college of liberal arts, law, theological, normal, music, art and preparatory schools. Historical Facts Lacking.
Governor Curtin and General Sickles were discussing the battle in the Springs Hotel this morning. After some good-natured criticism of the account of the battle, General Sickles suddenly said:

"In fifty years from now the historian who goes over the field and sees all these monuments will naturally inquire who fought the battle, and where the enemy was."

"Ah," said Governor Curtin, "that's just it. I have been trying for years to have an appropriate monument erected to the rebel lines, but without success. When I represented the Government in Russia, a Russian general, who was a student of the battle, showed me a map of the battle-ground exact in all its details, showing the positions of each side on each day. I was amazed and inquired how the Russians came to have such a correct map. He replied, 'Why, this is one of the great battles of the world. We were there. The Russians are eminently a military nation, and it would not hurt this country if they were a little more so in the spirit, at least, which they have in the future.'"
